

TID PHAROS ILLUMINATED DEPRESSOR

“The TID Pharos is a next generation transilluminating depressor designed to offer surgeons unprecedented control and visualization for peripheral vitrectomy.”

- Dr. Bozho Todorich, Device Creator with Vortex Surgical

- ◆ TID Pharos is a complete, one-piece illuminated device that connects directly to your vitrectomy machine
- ◆ A conventional ball-point depressor tip with a “Side Fire Illumination” feature allows for a better view, less glare and improved surgeon ergonomics
- ◆ The device is designed to offer the surgeon the ability to simultaneously perform unassisted scleral depression while shaving the vitreous base
- ◆ Additional benefits include: identifying retained lens fragments, identifying radiation seed placements and locating breaks or tears in the outer periphery.

Product Codes:

VS0801A - TID Pharos Illuminated Depressor, Alcon Constellation, 5/bx

VS0801B - TID Pharos Illuminated Depressor, B&L Stellaris, 5/bx
